

LAD
 Setup1: have both TDC/Disc crate and ADC crate
 Setup2: one crate for all TDC/Disc/ADC

	crates	CPU	TI	SD	FADC	TDC	vmeDSC	VTP	V1495	VXS-QSFP	MPD
SHMS	4	-	4	-							
HMS	3	-	3	-							
LAD Setup1	4	4	3	3							
LAD Setup2	3	3	2	2	7	1	7	1	1	2	6
LAD total	4/3	4/3	3/2	3/2	7	1	7 (Florian?)	1	1 (Florian?)	2 (Holly?)	6 (Holly)
TI total			10/9								

Waiting for SOLID orders to be delivered In hands

- Notes:
1. If using setup2, we don't need trigger supervisor
 2. Locate 3 TI (Bob), 1 VTP (hcvme04), 1 SD (Alex), 1 TS
 3. Currently, have 1 FADC from NPS for the ESB LAD test stand
 4. We can use SOLID FADC (October?), SD (September)
 5. Alex may have 3 CPUs
 6. I found one v1495 and 1 CPU in Hall C counting house (need test)
