

EPJA Topical Collection on Tensor Spin observables

- Deadline for Submission: August 23rd, 2024
<https://www.epj.org/epja-open-calls-for-papers/2724-epja-topical-collection-on-tensor-spin-observables>
- Subgroups in the paper:

Subgroup	Target Developments	Experiment	Theory
Leader	Dustin Keller	Elena Long	Wim Cosyn
Expected number of papers	7	6	7
Number of papers submitted to date	1	0	1

Subgroup

Author

Title

Target developments

Thorsten Maly, Timothy J. Keller

Instrumentation for High-Field
Dynamic Nuclear Polarization and
Electron
Paramagnetic Resonance
Spectroscopy

Theory

S. Kumano

PDFs, TMDs, and fragmentation
functions of spin-1 hadrons

Reminder to the subgroup leaders: please upload your suggestions for the referees (two per paper) in the organization spreadsheet.

After reviewing the first papers, we noted a wide variety of notations for the same variables/quantities.

We would like to organize a meeting to discuss the possibility of unifying these notations. The meeting will be held two weeks from now.

If possible, we would implement the unified notations in the papers with the agreement of the authors.
