

The deadline for submitting papers has passed (October 1st).

- We are waiting to hear how many papers in total were submitted.
- The main editors of EPJ will continue processing the papers for final approval.

Next deadline: December 1st

- The guest editors of the EPJA tensor special issue (Karl, Wim, Dustin, Douglas, Ellie, and Nathaly) need to write an introduction for the special topic.

To do (by guest editors):

- Gather and read the papers submitted to the tensor special issue.
- Create an Overleaf document to begin writing the introduction.
- Draft an outline for the paper.
- Write the paper (the guest editors will likely need to meet periodically).
